

## Do you need to control your critical business documents even after you have sent them to a supplier or customer?

Protect your workgroup or company's documents and keep them under control. With SealPath Enterprise, you will be able to know who within your organization or team has access to important documents that have been protected. You can also find out who outside your organization has access to protected documents and you can revoke access even when the documents are not in your possession. It logs warnings of attempts to access protected documents blocked due to lack of permissions. SealPath is designed for small and medium-sized companies or even workgroups within large companies/multinationals that require control and protection of their data.

### Secure internal/External collaboration

Keep your documents under control when you share them within and outside your organization. Revoke access remotely. Prevent someone who has left the organization or work group from continuing to have access to documents, even if they are on their personal computer or somewhere else.

### Reduce risks and legal liability

Avoid financial losses resulting from negligence and data leaks. Comply with the main regulations governing the protection of sensitive data. Gain peace of mind with a tool that gives you significant control over monitoring sensitive documents.

Protect the document	Share It	Work with your regular tools as usual	Monitor the use, Revoke access remotely
<p>Assign Permissions</p> <ul style="list-style-type: none"> <li>View</li> <li>Edit</li> <li>Print</li> <li>Copy &amp; Paste</li> <li>Add Users</li> </ul>			

SealPath makes easier secure information sharing, keeping the protection with the data or documents themselves. Share the documents with anyone you want, using the method of your choice. Upload it to the cloud, send it via email or transfer it to a USB drive, while still remaining confident that your information is protected, wherever it is. Revoke access when you stop working with a partner, control who has access, track the data that are important to you. You don't limit how the information is shared, you limit who can access it and what they can do with it.

## Operational efficiency and quick deployment

The administrator does not need to be involved for the members of a workgroup to share important documents with third parties. SealPath offers decentralized management, making it easier for departments, teams and individuals to collaborate securely, smoothly and productively, reducing the workload of IT staff. There are tools available that make easier the administration tasks such as transfer document ownership.

## Folder protections and automations

Apply protection Policies to folders on a File Server or Desktop and make sure that all documents stored on them will be automatically protected. This way, you will know that when a user copy or extract a document from the folder it will be protected and under the control of the enterprise. SealPath allows you to automate the protection of downloaded content from a document management system. CRM or ERP system.

## Audit trail and centralized monitoring

Obtain a detailed list of accesses to your documents, including blocked access attempts. Find out who has already accessed a protected document through its web admin control panel. You can keep track of the accesses and status of one of the most valuable assets of your company, the information: Who is accessing, when, blocked accessed, unprotected files, etc. SealPath gives you complete control and visibility of your critical documents.

### Easy-to-use even for the less experienced users

Use Office and Acrobat Reader to access your protected documents. Protect documents with a right-click, with a simple drag-and-drop operation or clicking on a button integrated in Microsoft Office. . Avoid having to remember passwords for your documents. Security must not be an inconvenience for your users. You can also create pre-protected document templates so that users start working with documents protected since its inception.

- Active Directory integration.
- For Office, PDF, AutoCAD.
